Site Plan Requirements

No building or structure or any part thereof shall be erected, extended, enlarged or structurally altered or moved until a zoning permit has been issued by the Zoning Administrator(s) or his authorized representative.

All applications for permit shall include a plat or site plan drawn to scale which clearly shows:

A preliminary site plan is required before permits are issued. Site plans shall consist of a metes and bounds survey plat provided by a licensed Professional Land Surveyor (PLS).

- **Note: Property lines shall be clearly identified and maintained for final inspection.**

A site plan includes the entire lot, drawn to scale, showing:

- Lot lines with dimensions, setbacks and road frontage delineated; existing or proposed driveways, parking spaces and walkways, with width and surface material described.
- The location of the proposed structure or use on the lot.
- The exact location and size of existing structures and uses.
- The height and number of stories of the structure(s).
- All existing and proposed buildings or other structures, with overall dimensions given and their setback(s) (required and proposed) from nearest property lines clearly delineated.
- Johnston County property tax identification number.
- Plat book and page number of subdivision as applicable.
- The existing and intended use of each structure or portion of structure.
- A title block indicating parcel identification number (PIN), subdivision name (if applicable), north arrow, bar scale, name of Professional Land Surveyor, with seal and signature of the person who prepared the plan, date map prepared (and any revision dates).
- The location and dimensions of driveways. Driveway approval procedures as required by the North Carolina Department of Transportation (NCDOT) shall be initiated.
- Location and description of landscaping, buffering and signs
- Such other information as may be necessary for determining whether the provisions of this ordinance are being met.

Additional information if these apply only:

- Existing or proposed well, septic tank and drain field location(s), or sewer and water easements and proposed connection location(s).
- All surface waters; FEMA 100-year flood fringe and floodway lines (or approximate 100-year flood line in unnumbered A Zones); flood hazard soils areas (adjust flood hazard soils to Johnston County topography or field surveyed low points as appropriate); wetlands; reserved open spaces; the location, dimensions and arrangements of all drainage way, watershed, riparian (stream), and
- other buffers and their associated required setbacks; the location of any existing or proposed easements (widths and purpose listed).
- Location, type and relevant dimensions and capacities of storm water management structures and other devices (if storm water management is required), plus associated easements (show dimensions).
